Navigating the Intersection: Western Water, Climate Change, and Public Health

October 26, 2016
Q&A Instructions

Q&A will follow the presentations. We welcome you to submit your questions at any time using the chat box on your GoToWebinar control panel.
Carpe Diem West

- Catalyzes successful programs around the American West to multiply their impact
- Tells the stories of innovative source water protection work
- Accelerates adoption of these innovative approaches
- Works to incorporate water justice and equity into the fabric of western water management
AGENDA

1. Introduction - Carpe Diem West & Water is Life  
   Kimery Wiltshire
2. Health Impacts – Western Water and Climate Change  
   Dr. Linda Rudolph
3. Salt Lake City – Vulnerabilities and the Unexpected  
   Laura Briefer
4. Participant Poll
5. Q&A  
   Dr. Tracy Delaney
6. Where do we go from here?
Clean and accessible water is critical to public health. Current climate change indicators make it clear we must immediately start cross-sectoral dialogues, representing all potentially impacted constituencies, in order to prepare health workers and the communities they serve for every eventuality.

Elise Miller, Executive Director, Collaborative on Health and the Environment
Water is Life Resources

Q & A

with Dr. Tracy Delaney
Program Outcomes

• Core leadership group is established
• Convening of field leadership identifies opportunities for cross-sector work, policies, action steps and priority research needs
• Outcomes from the convening are developed to the next steps
• One to two years of funding is secured
• Water is Life work is housed at an appropriate institution
